Very interesting puzzle game where you control a robot which must exit rooms full of obstacles that can be moved and removed only in certain manners, with a lot of traps and items to grab on the way. The difficulty increase the more you complete the rooms, with new obstacles and items appearing in the game and time limits.. Smart little game, and what is most important to me - it's fast. It's working smooth on my tablet with Win8.1 where most games are sluggish or don't work at all. Graphic is simple but I suppose thanks for that this is so fast game. I recommend it also because it's really smart and you need to use your brain. Starting from easy, the difficulty rises quickly but not too quick. It looks that I will play it for many hours..
